

Keith Billings, President (right) and Brian Heins, General Manager Integrated Metal Products

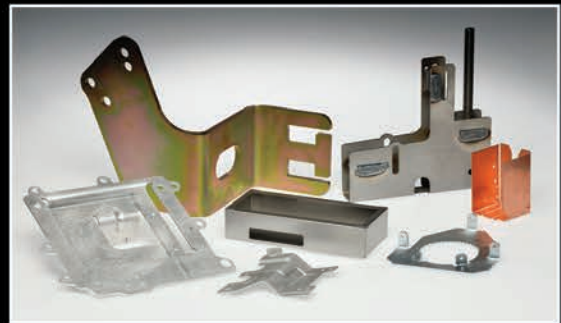

# At the Forefront.

“Amada’s ability to continuously innovate keeps us ahead of our competitors.”

— Keith Billings, President Integrated Metal Products

## Integrated Metal Products Retains Their Leadership Position by Partnering with Amada.

Located in Guelph, Ontario, Canada, Integrated Metal Products (IMP) is a leading contract manufacturer of precision fabricated metal components. For nearly 30 years, IMP has served a wide range of industries and earned a reputation for unsurpassed quality and reliability. IMP president, Keith Billings, attributes the company’s success to investing in leading-edge technology and state-of-the-art equipment. Billings put it in these words, “Amada’s commitment to advancing technology has allowed us to improve efficiencies and attract new customers, as well as keep our long-term customers coming back. We’ve always used Amada equipment. Over the years we’ve upgraded our older models to the latest generation — including press brakes, laser cutting systems and punch/laser combination machines. Amada’s innovative machines and processes keep IMP ahead of the competition.”

## Amada’s Networked Solution Provides:

- **Maximum Productivity** (High-speed shuttle tables on the FOM2 ensure continuous processing by externalizing the material setup process. The EMLK combines the punching power of the world’s fastest hit rates with the versatility of a 4kW laser).
- **Maximum Flexibility** (The FOM2 provides high speed processing for a wide variety of material types and thicknesses. The EMLK provides the ability to tap, form, punch and cut on the same machine).
- **Accuracy and Reliability** (The EMLK’s high-speed motion system is repeatable to .0003”, ensuring accurate parts every time. For more than 10 years, the FO series has a proven reputation for unparalleled accuracy and reliability. As the latest generation, the FOM2 continues to set new standards for precision and performance).

IMP’s General Manager, Brian Heins is also impressed by Amada’s service and support. Heins states, “Our Amada service engineer gave us his direct contact information and on one occasion came in at 10 pm on a Saturday night to ensure our weekend shift could continue cutting through the night. It’s great to work with a company that’s committed to our success.”

EMLK punch/laser combination with MP automated load/unload system.
